and accessories

Capability Statement

You'll be in good company

We've been so wonderfully fortunate to create spaces for some of the largest most respected names in Australia. Do any of these lovely folks ring a bell?

Made for life.

Four the record

Before we show you our work, here are four numbers that prove why you can trust us.

10
year warranty

2013_{est.}
More than a decade's experience

811_{and counting}
Completed locker spaces

3,952_{lockers}
Largest single-project delivery!
(We'd love to work with you to deliver an even bigger one!)

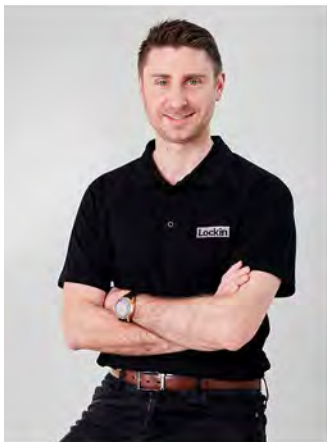

Project Management

We understand that skilled project management is essential to successful delivery - from beginning to end.

In addition to expertly managing our own production quality and deadlines, our team proactively communicates and coordinates closely with clients, builders, architects, complementary trades and specialty providers.

The lead for your project will be Jaron Tofful.

Jaron Tofful
Key Account
& Project Manager

In-house design

We specialise in turning creative concepts into buildable solutions.

Our set-out team brings deep knowledge of all things 'locker' and shares valuable insights throughout the process.

We collaborate with clients, Architects and builders to review designs through a buildability lens - assessing materials, methods, and alternatives to deliver smarter, more efficient, user focussed outcomes.

Simon Matthews
Estimator

Manufacture

Q: How can we confidently promise delivery of your customised solution within tight timeframes?

A: Proven systems and a team of skilled, experienced professionals.

With over a decade of experience, we've optimised our manufacturing processes and continuously invested in our state-of-the-art, purpose built facility - built to meet high-demand, fast-paced production.

Our qualified engineers, designers and production specialists - tradespeople who understand how to design, build, and finish with precision - ensure every project is delivered as promised

Installation

The final step to delivering your project as promised - our installers specialise in handling, fitting and finishing our joinery on site.

We have our own team of expert full time installers and a network of contractors who'll ensure that this crucial final step all goes to plan.

This enables us to install multiple projects at any given time and across different states including Victoria, New South Wales, Queensland and South Australia.

You imagine it -
we'll bring it
to life

Built to last

10 year
warranty

Our lockers are

built to last

Lockers can see a lot of wear and tear during their lifetime, so we make sure to only use hard wearing materials and fittings from the best suppliers across the globe. Our standards for performance even flows down to how we manufacture. Unlike our competitors, all of our lockers have a solid 18mm body construction that's nailed and screwed together for maximum strength.

Our 10 year warranty is proof that we build your lockers to last.

Project: 420 St Kilda Road EOT
Architect: Gray Puksand
Builder: McCormack Property Services
Featuring: PS2 locker with
Ojmar OCS lock

We believe
no product should
cost the earth

GBCA Green

Star Rating

Every Lockin locker meets the GBCA Green Star five-star standard and comes with a solid 10-year warranty.

We believe in

the circle of life

We actively sort all our by-products for recycling to reduce landfill waste, conserve natural resources and repurpose materials.

Our lockers are designed to move with you. They can be entirely dismantled, moved and reassembled if you change locations or need to shuffle things around.

It's simply 'good'

business

Much of our manufacturing process is powered from our rooftop solar, preventing extra tonnes of CO2 entering the environment and the lungs of our fellow humans.

Building things is thirsty work so we also collect rainwater for our own use, helping to limit wasteful runoff and conserve this valuable resource.

Other ongoing improvements include replacing plant lighting with LEDs and implementing processes to power down production machinery after use. Together, these efforts help us contribute meaningfully.

Our rooftop solar
helps power us.

A photograph of a modern interior space, likely a transit hub, featuring a wall of white lockers. A person is walking away from the camera, carrying a bag. The lockers are arranged in a grid pattern, and the overall design is clean and minimalist. The text is overlaid on the left side of the image in a bold, orange font.

We create wildly
customisable lockers
tailored to you
& your space

**Our in-house design
team are here to help**

We get it. Sometimes, you need some assistance or you just want to be hands-off and leave the details to a trusted team. Lockin's design and project teams are experienced professionals who stand ready to create an inviting space that solves your storage issue with minimum fuss. At any stage of the process, from creating a brief to final installation, we'll help you explore the possibilities and compare options. When you're ready to go, we can measure, design and build a custom product that maximises capacity and integrates seamlessly into your space.

From niche installations to multi-level locker projects, we'll share our product and design expertise to create your aesthetic, functional storage space.

Dimensions, materials,
finishes, accessories,
it's your choice

Some manufacturers will spend a lot of time discussing the limits of what's possible. We'd rather talk about your vision, and how we can make it come to life.

Thinking about curved lines? Done. Need something taller, wider or a little more to the left? No problem. Our hi-tech manufacturing facility allows us to customise our products to an unlimited range of needs and options.

That means you have the flexibility to choose from a huge range of commercial materials – from standard or decorative laminates to timber veneers, waterproof board, plastic or metals. You also have access to a range of useful accessories like mail chutes, fold out ironing boards and USB ports. Plus you have the chance to get creative with door finishes including perforations, edging, custom graphics, alternating colours and textures.

We build to your
specifications

At Lockin, we're big on collaboration. We take time to understand what you need, and how our products will integrate with the overall design aesthetic of your space. We work alongside our clients, architects and interior designers to make sure we build to your specific requirements and specifications. We're yet to find a space that we couldn't enhance with a custom-made Lockin locker. For example, if your cavity is 1700mm high compared to our standard range height of 1900mm, we'll simply make your locker a little smaller, minus the fuss. At Lockin, you won't have to worry about a hefty price tag for custom-built lockers.

We'll build your locker to fit what you need - simple!

Planning and
design where
it's okay to dream.

We loath telling you no. So, we don't. During our planning and design phase, we let you dream as big as your budget will allow.

From layout to picking the best locking system, our team is here to help you create a functional storage space that people won't want to leave.

We also work alongside Australia's finest architects and designers to breathe life into whatever you've imagined.

We optimise your
available space

Lockin has created more than 800 locker spaces Australia wide. From small to large scale projects, that's a lot of different spaces with a lot of different design and usage requirements.

Our experience means we understand how to design and build products that will maximise your available space, without sacrificing usability and functionality.

Custom lockers
tailored to you and
your lifestyle.

We craft lockers made for life. And, since Lockers vary as much as the lifestyles of the people that occupy them, we tailor each and every locker to you and your facility's needs from our factory in Melbourne, Australia.

Want something super simple and spacious? Say no more. Looking for something outfitted with bench seating, USB ports, a built-in ironing board unit and a digital padlock? Well, we can do that too.

And you won't have to lift a finger (if you don't want to). Simply just tell us what you want and sit back. We will handle the design, manufacturing, the delivery and the installation as if we were building a space for ourselves.

Fast, efficient, modern
manufacturing done right

Lockin, established in 2013, has more than a decade's heritage in custom design and manufacturing

Our modern facility includes best practice software that integrates all aspects of the production process. From estimating to sign off, our systems track, optimise and quality control every step along the production journey.

This means we meet our deadlines on time and on budget.

Our partnerships with both Stronghold and AMD Commercial Furniture means our lockers can be integrated into a custom joinery piece or combined as part of a total fit-out package for commercial projects.

Lockin, a Culpan company, is part of a family-owned Australian business with a heritage spanning more than 55 years.

More than
a decade's experience
manufacturing custom
engineered products

Lockers made for everyone

At Lockin we believe in building spaces that fit all our lives – no ifs, buts or asterisks!

Though there are currently no legislative requirements for accessible locker design, to us it's important that our products meet the intent of the Disability Discrimination Act (DDA) and the applicable Australian Building Standards.

That's why we created the Australian first range of DDA accessible lockers and accessories and our guide to creating DDA compliant locker spaces that meet the needs of people living with disability.

You can download our
DDA Accessible Locker Guide.
lockin.com.au/accessible

Hanging lockers

Our range of hanging lockers cater for those with a busy work-life schedule. Featuring designs exclusive to Lockin, each locker combines hanging space with the ability to store large, bulky items. Perfect for change rooms, end-of-trip facilities, gyms, studios and sporting clubs. Mix and match to create your space.

KEY FEATURES

- Functional hanging space
- One and two user bays
- Integrated bench seating
- Fully customisable

POPULAR USES

Gymnasiums

End-of-trip

Change rooms

Club rooms

STANDARD CONSTRUCTION

Body: E1 white or black HMR particle board with matching ABS edge

Doors: Laminex or Polytec laminate with matching ABS edge

Accessories: Key lock, black pull handle and number tag

Seat: Polished 90mm Tasmanian Oak bench seat

Shelving lockers

Our range of shelving lockers are perfect for the workplace, education and active spaces like yoga studios. They're designed to store small to medium items such as laptops, phones, bags and folders. The locker range features fixed or adjustable recessed shelving, with each locker catering for two to five users.

KEY FEATURES

- Two to five doors per bay
- Fixed or adjustable shelving
- Fully customisable

Custom steel lockers

Introducing our Lockin custom steel lockers.

You get to choose the powder coat colour that best compliments your space, add a striking perforation pattern for the doors, select a locking system and the modular layout and lockers sizes that you need.

KEY FEATURES

- 300 and 400 width options
- Up to 10 users per bay
- Custom made in Melbourne

CUSTOMISATIONS

- Slope top
- Bench seating
- Combination locker banks
- Door perforations
- Multi colour powdercoat
- Elevated stands or plinths
- Choose from our lock range: key, digital, RFID or hardwired
- Number plates

POPULAR USES

Workplace

Change rooms

Club rooms

End-of-trip

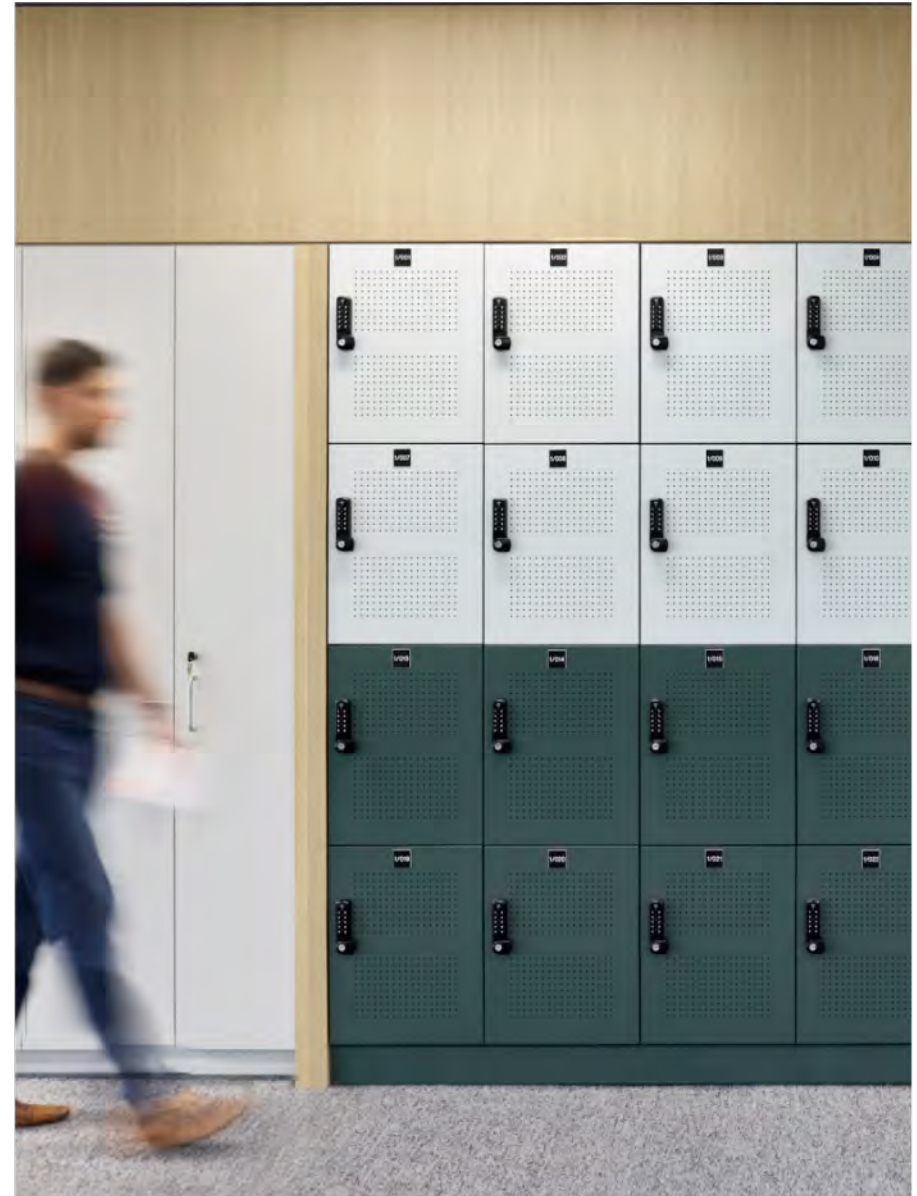

STANDARD CONSTRUCTION

Body: Welded steel

Powdercoat: Available in a range of colours

Accessories: Locks, stands, benches, planters, hoods & numbers

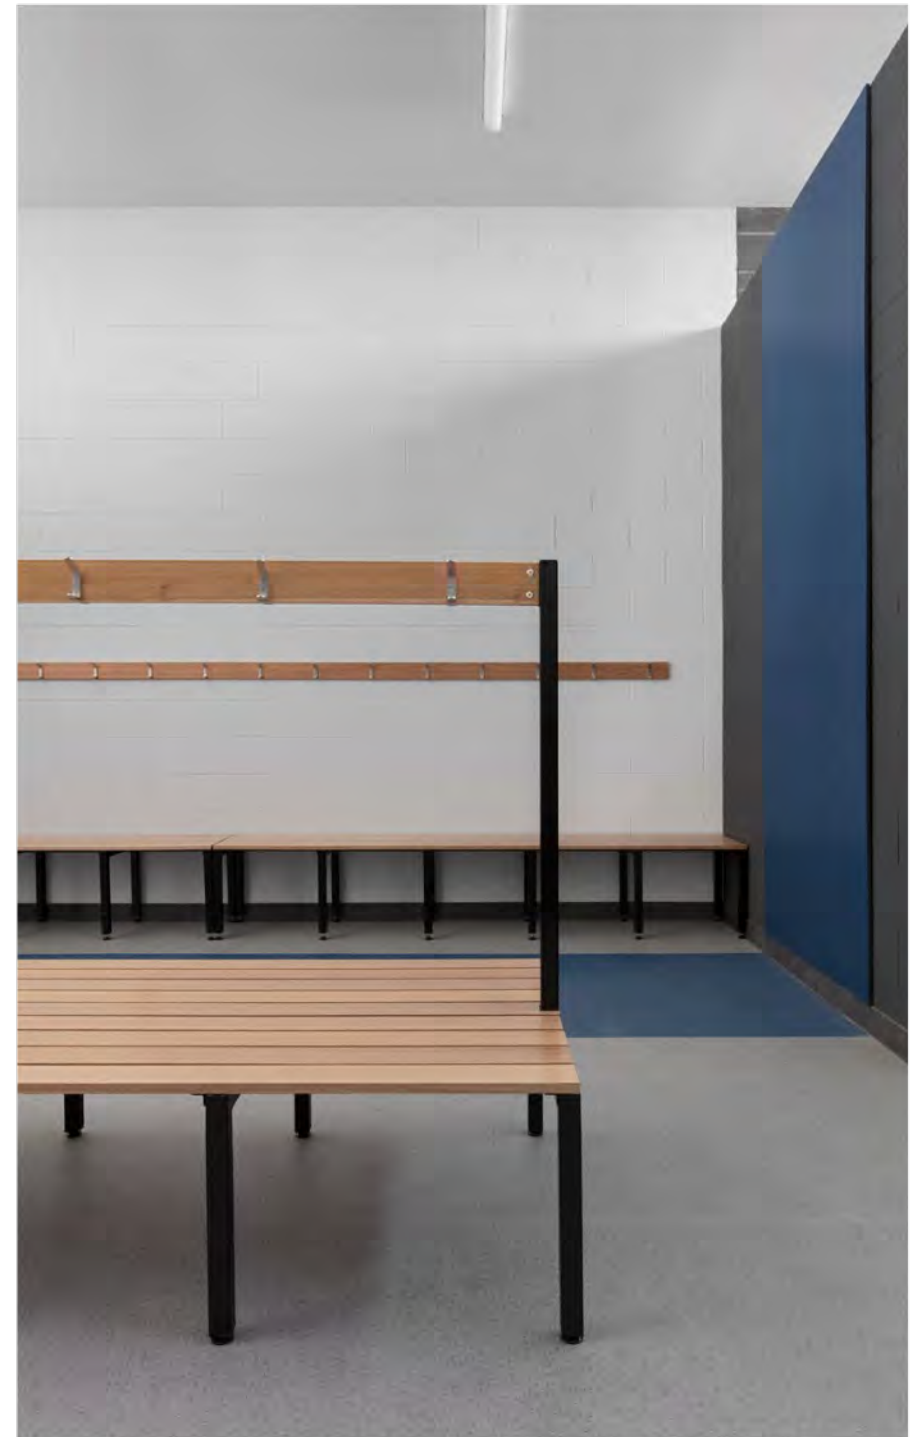

Bench seating

Have you tried to tie your shoes when there's nowhere to sit down? Our customisable bench seating is the answer! Our range includes classic timber bench seats, shoe shelves and custom ottomans that can be made to any length or shape. So you'll never have any trouble tying a double knot.

STANDARD CONSTRUCTION

Timber seat: Polished 90mm Tasmanian Oak bench seat with powder coated or stainless steel frame.

Shoe shelf seat: Polished 90mm Tasmanian Oak slats with matching E1 Laminex end panels and ABS edge.

Project: 300 La Trobe Street EOT Architect: Gray Pukсанд

Locker locks

A locker lock that automatically opens at 6PM every Friday? How about an RFID lock that integrates with your building access card? Or a lock that could dive underwater, re-emerge and get back to work totally unscathed. From basic key locks to intelligent access control systems we have a locker lock for any job.

WHAT'S THE DIFFERENCE BETWEEN SHARED OR DEDICATED USER MODES?

Locker locks can be programmed in a variety of different modes to suit the environments they operate within.

In shared mode the user chooses an available locker and operates it with a self-selected code or key. Once the locker is vacated, it becomes available for a different user. This is particularly useful in high traffic environments such as gyms and public areas.

In dedicated mode, the user is assigned a locker and operates it with a fixed code or key. Once set, the fixed code can only be changed by a manager. Dedicated mode works well in schools and offices where a locker belongs to one person only.

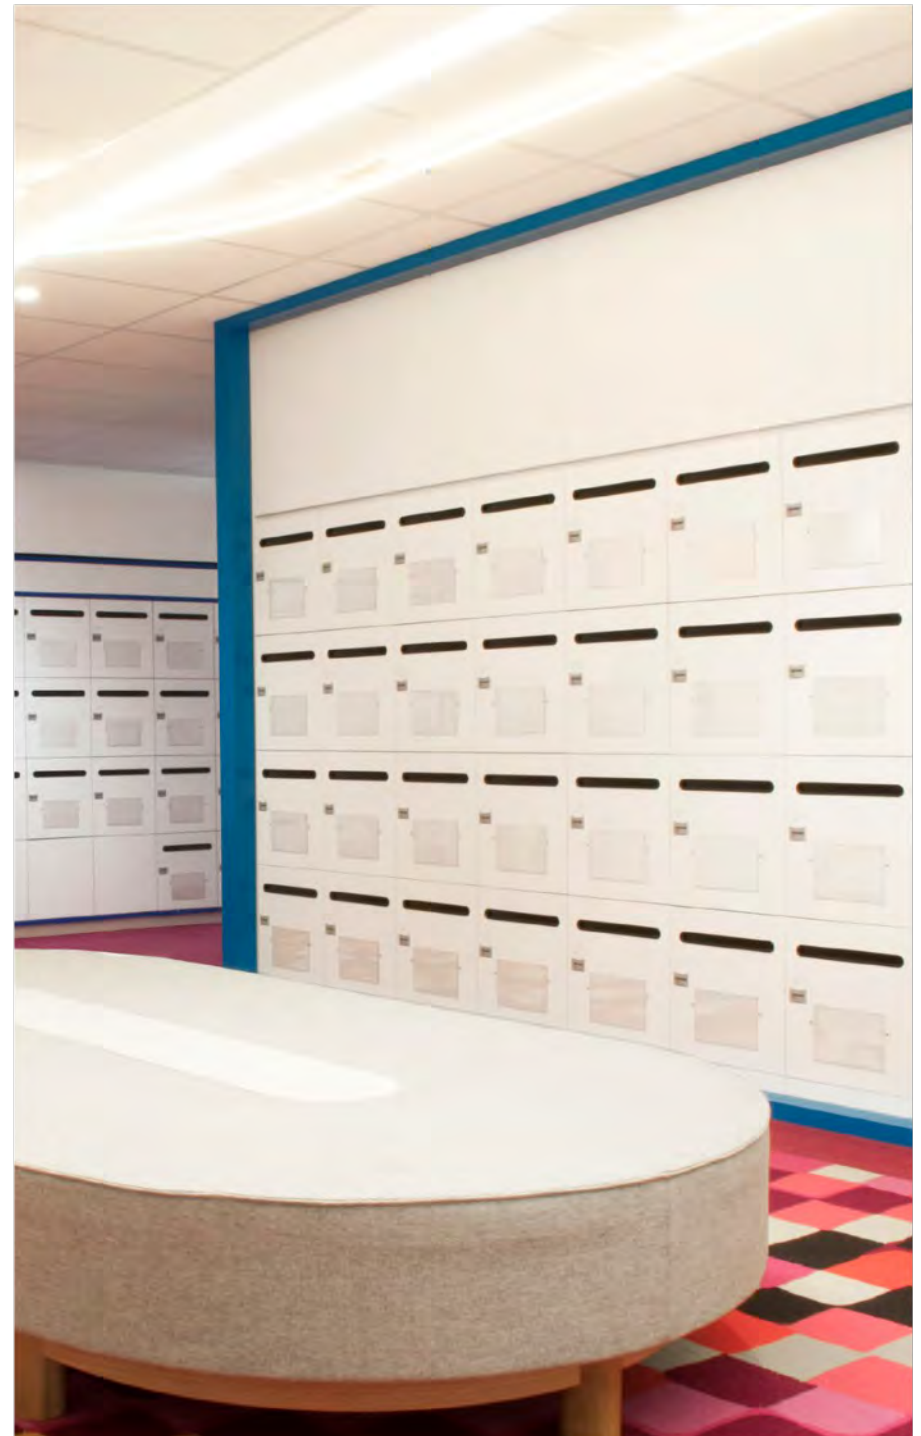

SMART LOCKS (GANTNER, LOQIT AND OJMAR NEXO)

Smart locks are a sophisticated access control system for lockers. Combined with intelligent software, smart locks can be programmed to various operation modes, providing users with RFID access to their locker. Smart lock systems can also integrate with existing access control networks within a building.

Locker accessories

What's a hanging locker without a hanger? It's the small details that make a big difference to your space. That's why we offer a range of custom options and accessories to make your locker space even better - and made for life.

Numbers and graphics

Make a statement with custom graphics on your locker doors. Lockin offer an unlimited range of locker numbering options. From vinyl decals, laser-cut acrylic to printed door wraps, we can make any color, shape, and font that you can imagine happen.

Project: Porter Davis Architect: The Bold Collective

How | to | specify

How to customise your Lockin locker?

01

**SELECT THE RANGE
THAT BEST SUITS
YOUR NEEDS**
