ojmar®

INTELLIGENT LOCKING SYSTEMS

ADMINISTRATIVE CENTRES, SWIMMING POOLS, FITNESS CENTRES, SCHOOLS ... HOW MANY PEOPLE MIGHT USE A LOCKER IN THE COURSE OF A DAY? THE SUCCESS OF OJMAR'S COIN-OPERATED LOCKS IS NOT ATTRIBUTABLE SOLELY TO THE SIMPLICITY OF THEIR DESIGN.

Our products reflect our philosophy. They have a long life, they are intended for all types of users and they cater for different demands and levels of need. This is because when we design our products, we think long term.

Our entire range of coin-operated locks is furnished with interchangeable cylinder, an important security feature in the event of key loss or theft. Coin size is not an issue either since the optional, adjustable version of the coin lock supports coins of diameters from 21mm to 28mm.

The Ojmar coin lock can be converted into a coin collect lock by simply fitting a coin collecting box to it.

COIN-OPERATED LOCKS
FOR DRY AREAS

REF. 74  

The **model 74** coin lock is ideal for collective-use facilities in dry areas such as schools, gyms, fitness clubs, shopping centres and the like. The interchangeable 10-wafer cylinder and reversible key provide a simple but solid and reliable solution.

MODEL	Ref. 74
MAIN FEATURES	
CYLINDER	10-wafer, Die cast Interchangeable Cylinder
DIFFERS	Up to 4000
KEY	Standard round head and reversible
COIN RETURN BUTTON	✓
ADJUSTABLE	✓
LGA CERTIFICATION	✓
MATERIALS	
LOCK BODY	Polycarbonate + ABS. High impact and torsion resistance
INTERNAL PARTS	Die cast
CYLINDER	Die cast
KEY	Nickel plated brass
SPRINGS	Stainless steel
COIN	
MAXIMUM DIAMETER	30 mm
MINIMUM DIAMETER	20 mm
MAXIMUM THICKNESS	3,3 mm
MINIMUM THICKNESS	1,5 mm
ACCEPTED COINS € ZONE	20cents, 50cents, 1€, 2€
ACCEPTED COINS € ZONE	20p, 50p, 1€, 2€
ACCEPTED COINS \$ ZONE	0,25\$
DIMENSIONS	
LOCK BODY LENGTH	110 mm
LOCK BODY HEIGHT	125 mm
LOCK BODY THICKNESS	17,5 mm
SHOOT DIMENSIONS	25 x 5 mm
MINIMUM DOOR THICKNESS	1 mm
MAXIMUM DOOR THICKNESS	23 mm
LATCH STROKE	15 mm
FIXING HOLES	93,5 x 93,5 mm
RECOMMENDED FIXING SCREWS	Compact. DIN 7985 M5x20 Wood. Pan head POZI 40° Ø5x25. Metal. DIN 7981 Ø5,5.
KEY THICKNESS	2,5 mm
MECHANICAL REQUIREMENTS	
N° OF CYCLES	60,000 machine cycles according to LGA
ACCESSORIES	Coin collecting box Bracelet

COIN-OPERATED LOCKS
FOR WET AREAS

REF. 75 & 76   

The material used in the manufacture of these coin locks are highly resistant to corrosion, making them the ideal solution for wet areas.

The stainless steel pins offer greater resistance and security than conventional brass pins.

The interchangeable cylinder is a security feature in the event of key loss or theft. The anti-reservation master key can be used in case of emergency where customers require assistance but also as an efficient means of

preventing locker reservation. It enables lockers to be opened and closed without inserting a coin, meaning that users who overstay their welcome lose their deposit and locker availability is guaranteed.

Model 76 is supplied with a security key. The key is flat and reversible and thus pleasant and easy to use.

MODEL	Ref. 75 & 76
MAIN FEATURES	
CYLINDER CORE	Interchangeable solid brass core with 6 stainless steel pins
DIFFERS	Up to 1.600

CARD LOCK
DRY AREA USE

A SPORTS COMPLEX IN A VANGUARD
WORKPLACE. OJMAR'S CARD LOCK PROVIDES
ADDED VALUE. IT IS A CONCEPT THAT BRINGS
TOGETHER DIFFERENT IDEAS.

Our card locks can be exclusively card-operated, enabling members of an establishment to use lockers without having to supply a coin. Alternatively, in the case of facilities with both members and occasional users, our card locks can combine operation by cards and coins alike. Members access lockers with their cards and occasional users by inserting a coin. Card locks also prevent locker reservation because cards always have to be retrieved by users before they leave the premises.

To avoid use by unauthorised persons, the card only works when punched with an exclusive card puncher available only from Ojmar.

CARD OR COIN LOCK
WET AREA USE

CARD-OPERATED LOCKS
FOR DRY AREAS

REF. 74  +  

Card lock model 74 is designed for dry facilities where users have a card-based identification or access system: schools, gyms, fitness clubs, etc. It provides a solid and reliable solution.
