Setup

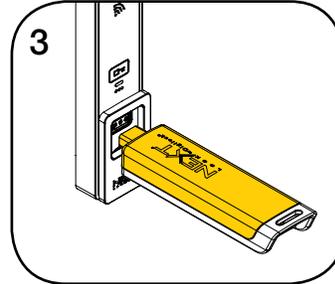

Locks are shipped with factory default settings (only operates by pressing ). Each lock must be set up to operate with a Programming Key and Manager Keys.

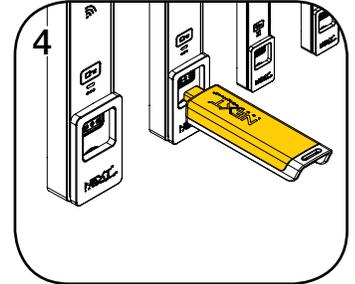

1
Insert the Programming Key.
A two-tone beep will be heard and the LED will flash.

2
While the LED is flashing, insert one Manager Key at a time.
A two-tone beep will be heard for each Manager Key programmed.

3
While the LED is flashing, insert the Programming Key.
A two-tone beep will be heard and the LED will turn off.

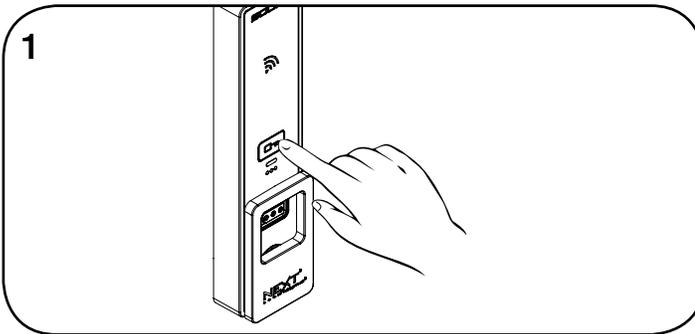

4
Repeat above steps for each lock or follow instructions to Express Register Manager Keys to setup all locks.

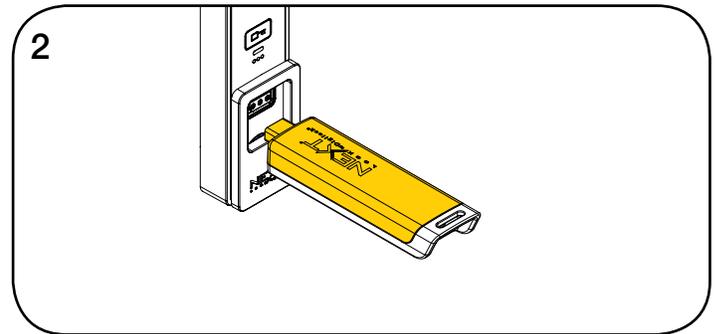

Programming Instructions

Express Register Manager Keys

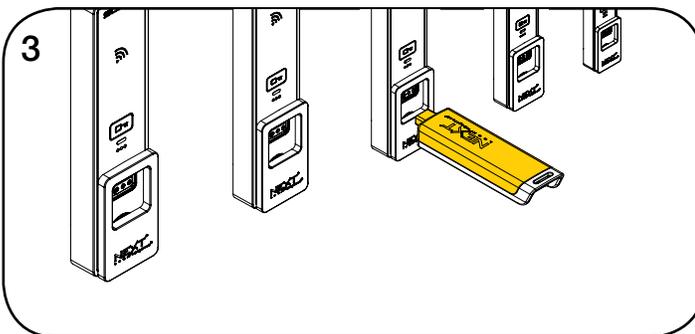

The Programming Key can quickly program multiple locks to operate with the same Manager Keys.

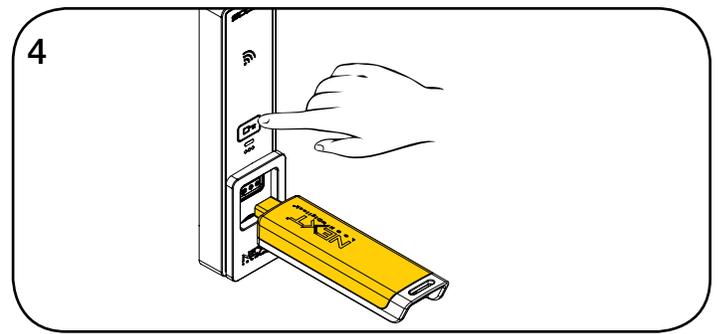

1
Go to the lock already programmed to operate with the Manager Keys. Touch and hold  for 10 seconds (a two-tone beep will be heard after 5 seconds followed by 2 sets of two-tone beeps after 10 seconds) then release.
The LED will flash.

2
While the LED is flashing, insert the Programming Key.
A two-tone beep will be heard and the LED will turn off.

3
At each lock to be programmed, insert the Programming Key.
A two-tone beep will be heard and the LED will flash once to indicate successful registration.

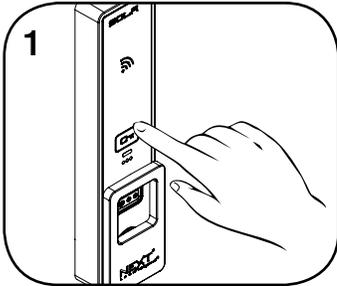

4
To end Express Registration mode:*
Go to any programmed lock.
Press  then insert the Programming Key.

*The Programming Key will continue to function in Express Registration mode until it is used to operate a lock.

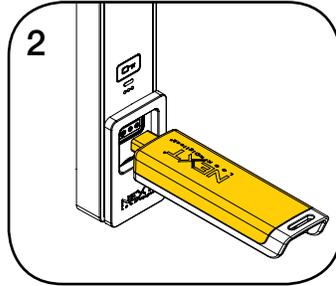

Programming Instructions

Add Manager Keys

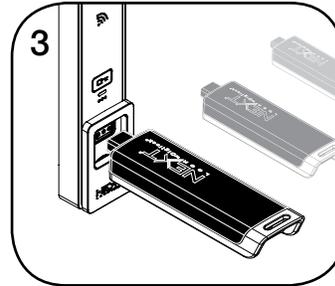

Manager Keys can be programmed to the locks at any time.

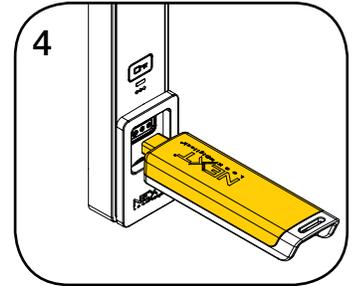

Go to a lock requiring additional Manager Keys.
Touch and hold  for 5 seconds (a two-tone beep will be heard after 5 seconds) then release.
The LED will flash.

While the LED is flashing, insert the Programming Key.
A two-tone beep will be heard.

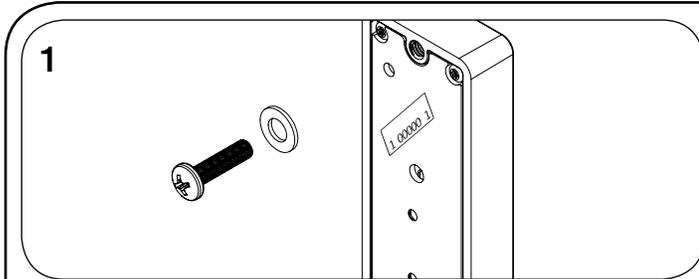

While the LED is flashing, insert each additional Manager Key one at a time.
A two-tone beep will be heard for each Manager Key programmed.

Insert the Programming Key.
A two-tone beep will be heard and the LED will turn off.
Repeat above steps for each lock or follow instructions to [Express Register Manager Keys](#) to quickly program multiple locks to operate with the same Manager Keys.

Replace Keys

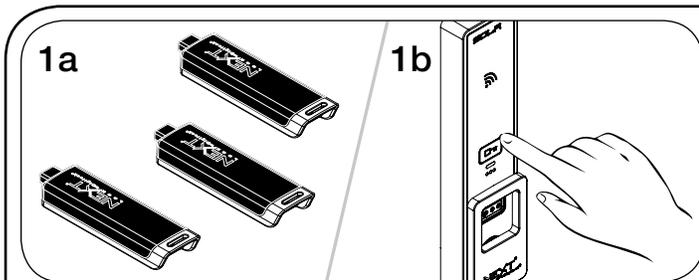

The locks must be reprogrammed to prevent the lost/stolen keys from operating a lock.

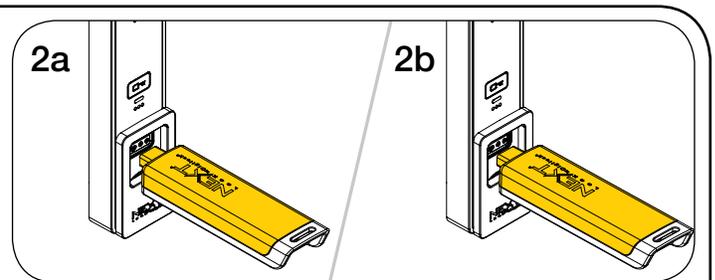

To replace the Programming Key:
Note the order or serial number (found on the lock's rear).

Contact Digilock Support to purchase a replacement Programming Key.

To replace the Manager Keys:
Collect all remaining and replacement Manager Keys.
Go to any lock operated by the lost/stolen Manager Keys. Touch and hold  for 5 seconds (a two-tone beep will be heard after 5 seconds) then release.
The LED will flash.

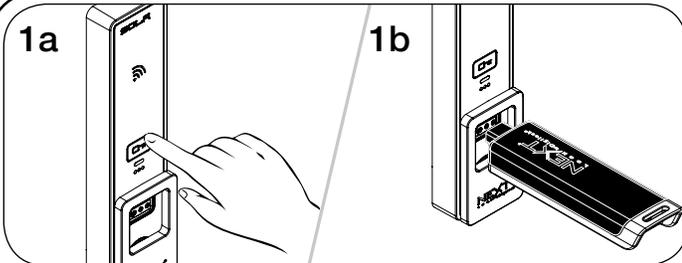

While the LED is flashing, insert the Programming Key.
A two-tone beep will be heard.
Insert the Programming Key again.
Three sets of two-tone beeps will be heard and the LED will turn off. All previously programmed Manager Keys will be erased.
Follow instructions to [Add Manager Keys](#) to program the remaining and replacement Manager Keys to the locks.

Programming Instructions

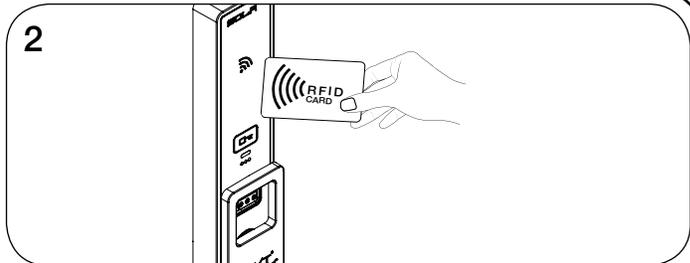

Assign the User Credential

Once a user credential is assigned, the previously assigned user credential will no longer operate the lock.

2

Assign a User Key:
 Touch and hold **M** for 5 seconds (a two-tone beep will be heard after 5 seconds) then release.
 The LED will flash and the RFID reader will turn on.
 Insert a valid Manager Key.
 A two-tone beep will be heard.

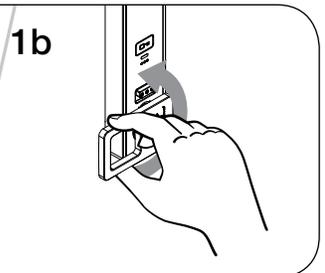

While the LED is on, insert a User Key.
 A two-tone beep will be heard and the LED will turn off.

Operating Instructions - In Assigned Use Functionality

In assigned use functionality, users operate the lock with their assigned user credential (either a User Code or a User Key). To reassign a lock to a different user, follow instructions to [Assign the User Credential](#).

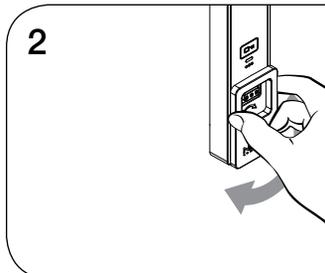

1a

1b

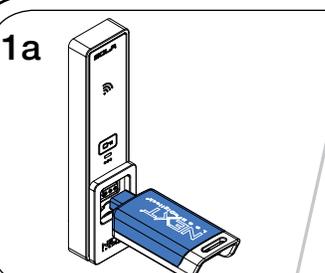

Operate with the RFID credential

To unlock: Touch [] then present the assigned RFID credential then turn the handle to the unlocked position. Open the door.*

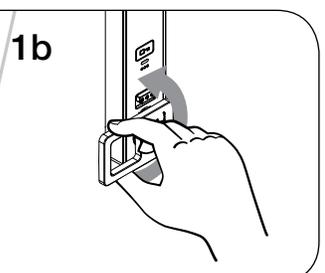

2

To relock: Close the door then turn the handle to the locked position.

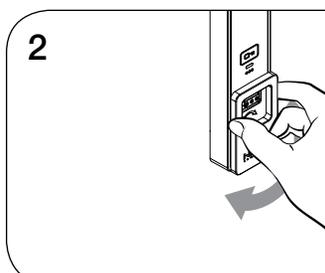

1a

1b

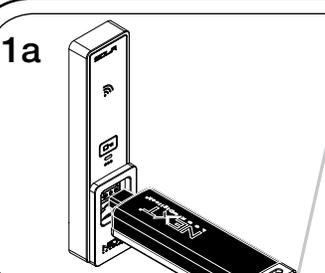

Operate with the User Key

To unlock: Insert the assigned User Key then turn the handle to the unlocked position. Open the door.*

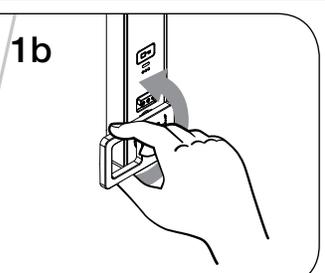

2

To relock: Close the door then turn the handle to the locked position.

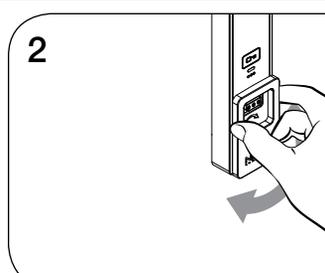

1a

1b

Operate with a Manager Key

To unlock: Insert a valid Manager Key then turn the handle to the unlocked position. Open the door.*

2

To relock: Close the door then turn the handle to the locked position.

*The lock will remain in the locked position if the handle is not turned within approximately 6 seconds.

Support

Low Battery Indicator

After locking or unlocking, the lock emits two sets of three beeps indicating that the batteries are low. Replace the batteries.

Does not Unlock with the User RFID Credential or User Key

The lock does not recognize the User Code or User Key. For immediate access, operate with a valid Manager Key then follow instructions to [Assign the User Credential](#) to assign a new User RFID Credential or User Key to the lock.

Does not Operate with a Manager Key

The lock does not recognize the Manager Key. Follow instructions to [Add Manager Keys](#) to program the Manager Key to the lock. For immediate access, operate with another valid Manager Key.

Does not Operate with the Programming Key

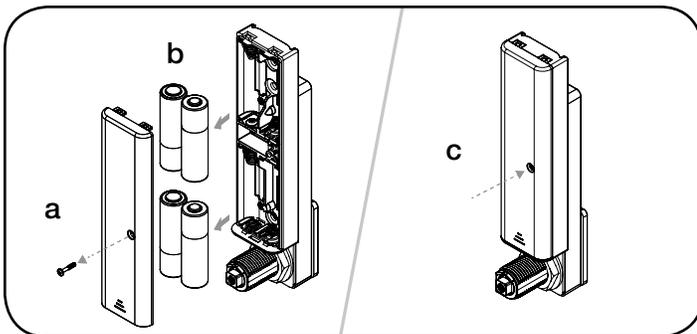

The lock does not recognize the Programming Key. If the Programming Key has been replaced, operate with the Replacement Programming Key. Contact Digilock support for additional assistance.

No Audible Feedback when is Pressed

The batteries may need to be replaced. For immediate access, operate with a valid Manager Key.

Battery Replacement

It is not necessary to uninstall the lock from the door.
In case of battery failure, operate with a valid Manager Key.

- a. Remove the screw and the battery cover.
- b. Replace the four premium AA batteries.
- c. Replace battery cover and screw.
