

Basic lock

Push rotor hasp lock

by: BMB

The padlock hasp is a cam locker lock secured by an external padlock. Our padlock hasp fits padlocks with a shackle diameter of 8mm and features an anti-rotation system to prevent threading when in the locked position. Padlocks sold separately.

SPECIFICATIONS

Function: Hasp for padlock

Type: Mechanical

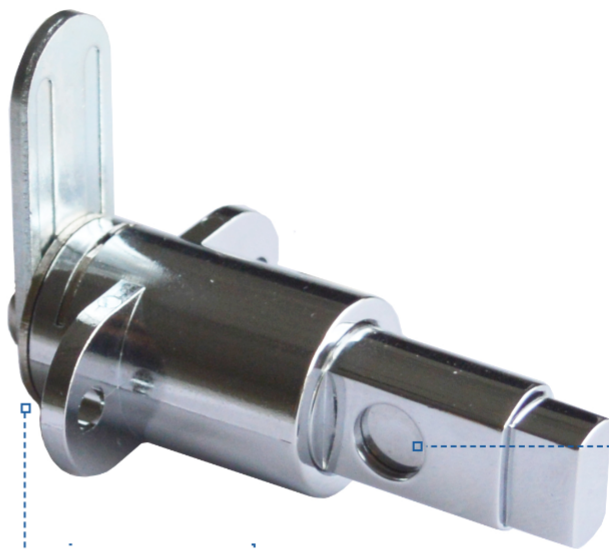

Mode: Dedicated / Shared

Door thickness: 1 mm - 22 mm

8mm

Standard Padlock Receiver

Suits various standard padlocks with up to 8mm shackle.

Anti-Rotation System

Receiver prevents any cam lock threading when in locked position.

Padlock not included.

Padlocks are available separately through Lockin
